### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see response, filed 7/21/05, have been fully considered and are persuasive. Therefore, the FINAL rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Palmer 6,187,411.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 2, 7-9, 16-18 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Palmer ('411). The reference discloses the invention as claimed, namely a composite stiffened panel comprising a skin 54 of fiber-reinforced composite material, rows of stiffeners 56 with flange portions (the part of the stiffener that tapers down on each of the sides of the stiffeners can be considered flanges) and fiber-reinforced composite material 52 covering the stiffeners and stitched on said skin 54 along flange portions of said stiffeners in a longitudinal direction of said stiffeners; see column 3, lines 44-58 and Figure 8. The various process limitations, such as "by a RTM or an RFI

method", "so as to be loosened in some places", etc. do not provide structurally distinguishing features to the final products. Concerning claim 2, some of the stiffeners in the reference's article can be considered "ribs" since they are not required to connect the stiffeners in view of the phrase "for connecting said stiffeners".

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 14, 15 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Palmer ('411) in view of Willden et al. The primary reference discloses the invention substantially as claimed; see column 3, lines 44-58 and Figure 8. However it does not disclose the claimed L-shaped ribs. The secondary reference discloses the use of L-shaped ribs or frame members which extend over parallel stiffeners on a skin panel; see Figure 3. It would have been obvious to one of ordinary skill in the art to provide ribs or frame members to the article of the primary reference in view of the teachings in the secondary reference in order to provide the desired structural properties to the panel for a particular end use.

***Allowable Subject Matter***

6. Claims 10-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander Thomas whose telephone number is 571-272-1502. The examiner can normally be reached on 6:30-4:00 M-THUR.
